

LAHAINA BYPASS Phase 1C

What is the Lahaina Bypass (Phase 1C) Project?

The purpose of this project is to evaluate extending the existing Lahaina Bypass north from Keawe Street to create a continuous highway around Lahaina and Kā'anapali. The Hawai'i Department of Transportation and the Federal Highway Administration are leading this effort in partnership with Maui County and the U.S. Department of Housing and Urban Development, with funding from federal wildfire recovery resources and additional state and federal sources.
